

# SAFETY, HEALTH AND ENVIRONMENT (SHE) APPRENTICESHIP

## WHAT YOU WILL LEARN

By the end of this course you will be able to:

- Assist in the development, management, implementation and monitoring of the Safety, Health and Environmental Management System by updating systems in line with changes in legislation or best practice
- Assist and/or manage the investigation of accidents, incidents, dangerous occurrences and near misses
- Plan and have systems in place to manage change
- Present information or training in an assertive, engaging way
- Work with others well in a team and lead by example in a collaborative way

## HOW YOU WILL BE ASSESSED

Assessment of knowledge will be gained through a portfolio of evidence. Delegates will be required to complete elements of self study, which also includes the development of a business case, research project and a presentation. In addition, there are multiple choice and short answer tests to cover the learning in two of the courses (IOSH Managing Safely, IOSH Environment for Business)

## DURATION

The apprenticeship will typically last 24 months.

## QUALIFICATIONS

This apprenticeship is a level 3 and is equivalent to two A-levels. It takes 24 months to complete. Providing the full 24 month journey is completed, IOSH technical membership will be achieved.

## PROGRESSION

Following successful completion of the SHE apprenticeship program many SHE Apprentices progress onto higher levels of qualification for example level 6 degree level Diplomas. They also aspire to become Chartered members of IOSH and advance in their career .

## COURSES

The program will deliver the following courses

### NCFE IOSH Safety and Health for Business Qualification:

#### Unit 1: Safety and health management in an organisation

Understand your responsibilities in relation to the safety of yourself and others in the organisation.

The unit also focuses on:

- Planning and monitoring safety and health performance
- Health and well-being
- Health hazards
- Safety hazards
- Good practice

#### Unit 2: How to influence a safety and health culture in an organisation

Understand organisational culture and techniques that can help develop good practices in safety and health

The unit also focuses on:

- Going beyond compliance
- Human failure in an organisation and how this influences or impacts on safety
- How to deliver positive change within an organisation
- Tackling behavioural and operational challenges to boost business performance

#### Unit 3: A strategic, business focused approach to safety and health

Understand the main function and aims of an organisation, and how strategic drivers affect its operation.

The unit also focuses on:

- The impact good practices can have on how an organisation operates
- The added value those practices can bring
- Accountability
- Ethics
- Compliance
- Managing uncertainty

### IOSH Managing Safely:

Provides the knowledge and tools required to manage safely and equips learners with the skills to deliver positive SHE improvements within any organisation.

#### Units covered:

- Assessing risks
- Controlling risks
- Understanding responsibilities
- Understanding hazards
- Investigating incidents
- Measuring performance

### IOSH Environment for Business:

Provides the latest understanding and practical guidance to integrate environmental management and sustainability into everyday business activity.

#### Units covered:

- What is meant by the term 'environment'
- How the environment can impact upon organisations
- How organisations can impact the environment
- Ways in which organisations can minimise environmental risks and maximise sustainable opportunities
